

ENTREPRENEUR IN RESIDENCE (EIR)

ANOVA START-UP STUDIO BY QUANTMETRY

“EIR is an all-around athlete who can wear many hats and add value in multiple ways.”

WE ARE LOOKING FOR AN ATHLETE

Quantmetry is a leading data consulting company specialized in AI. In 2017, Quantmetry launched ANOVA, a start-up studio to build the future of AI.

The assignment requires an AI technology savvy person with strong project management skills who is interested in health industry. Depending on your success during the launching period, this project could lead to a CEO or another executive role in a new company based on the product.

Qualifications

- Accomplished executive
- Commercialization experience
- Strong project management skills
- Tech savvy, specifically know-how in AI
- Network of investors and partners
- Ability to raise money
- Interest in health industry

Responsibilities

- Define business model
- Outline the Business Strategy
- Develop funding strategy and investor pitch
- Outline key milestones for financing
- Evaluate new potential investments
- Determine target market segments
- Identify and prioritize strategic partners

Benefits

- Get office space and have an opportunity to work with leading data experts in AI
- Administrative support to your start-up from ANOVA
- Remuneration with a possibility to have an equity in the start-up
